PROJECTS

DRIVER HIRING MANAGEMENT SYSTEM | MAIN PROJECT | BCA

The Driver Hiring Management System streamlines the process of hiring and managing drivers. It features three modules: User, Driver, and Admin. Users can book, pay, and rate drivers, while drivers manage availability and accept bookings. Admins oversee driver management, ride requests, and transactions. The platform ensures secure payments, driver verification, and real-time tracking, providing a seamless, user-friendly experience for both service providers and customers.

PHP, JavaScript, CSS, HTML, Django

TOURISM MANAGEMENT SYSTEM | MINI PROJECT | BCA

The Tourism Management System simplifies the process of booking travel packages through an intuitive website. It consists of three main interfaces: User, Tour Operator, and Admin. Users can browse and book travel packages, while tour operators manage offerings and availability. Admins oversee bookings, user management, and system performance. The platform streamlines travel planning, enhances user experience, and ensures efficient communication between all parties involved in the booking process. PHP, JavaScript, CSS, HTML, MySQL

PORTFOLIO WEBSITE

Portfolio website to showcase education, projects, profile details, and skills. It highlights key achievements, relevant projects, and technical expertise, providing a comprehensive view of the individual's professional capabilities. With clear sections for education, skills, and project details, it presents a well-organized, visually appealing summary of one's professional journey.
